

Stainless Steel Push-In Fittings

...Make the leak free connections with Sealexcel products at economical price...

SEALEXCEL (INDIA) PVT. LTD.,

is a fast growing manufacturing company in the design, development, production and marketing of high quality products such as

- Twin ferrule tube fittings.
- Single ferrule tube fittings.
- 37° Flared tube fittings.
- Stainless steel push-in-fittings.
- Precision pipe fittings and adaptors.
- Bar stock and forged body needle valves.

SEALEXCEL manufactures all above products to very stringent tolerances under rigid quality controlled procedures approved to ISO 9001:2000 quality management systems and tested with continuous Research and Development backing to withstand the demand of high performance world class quality products for instrumentation and process tubings and used in the environments such as Oil, Gas, Chemical, Petrochemical, Nuclear, Power Plant, Pharmaceutical, Hydraulic, Marine, Packaging and Printing Industries etc.

SEALEXCEL has two manufacturing units in India having modern manufacturing facilities with CNC lathes, Single Spindle Auto Screw machines, Capsten Lathes, Thread Rolling and many other machines to provide good quality products at economical prices.

SEALEXCEL **Product Warranty:**

SEALEXCEL Products have a warranty of 12 months from the date of shipment against any defect in material or workmanship. This warranty is the replacement of determined defective parts only.

SEALEXCEL **Quality Policy:**

We at SEALEXCEL are committed to meet all customer's requirements and enhance customers expectations by providing them excellent products at economical price in time and by...

- ☞ Continually improving the products, process and systems,
- ☞ Involving all the employees and enhancing their competency,
- ☞ Complying with all applicable statutory and regulatory requirements.

SEALEXCEL **Aim:**

To make every efforts towards producing the **WORLD-CLASS** products at economical price.

SEALEXCEL

Stainless Steel Push-in-Fittings

Application:

SEALEXCEL Stainless Steel Push-in-Fittings are resistance to aggressive environments and corrosive fluids etc., which are generally used in Chemical, Food, Printing, Packaging, marine Pharmaceutical Industries etc.,

SEALEXCEL Stainless Steel Push-in-Fittings are compatible with,

- Semi-rigid nylon tube
- Flexible polyurethane tube
- Low density polyethylene tube
- Fluoropolymer FEP140 tube
- Stainless Steel and copper tube (when grooved)

Design:

SEALEXCEL Stainless Steel Push-in-Fittings consist of Six precision components such as Body, Releasing Sleeve, Washer, Gripping Collet, Guide Ring and 'O' Ring.

These components have been carefully designed and manufactured to very stringent tolerances under rigid quality control procedures approved to ISO 9001:2000 to provide a zero leak at all tubing connection in Instrumentation and process tubing.

Advantages:

SEALEXCEL Stainless Steel Push-in-Fittings are,

- Easy for manual connection and disconnection.
- No tools required for connection and disconnection.
- Full Flow without pressure drop.
- Automatic tube sealing with 'O' Ring and locking with gripping collet.

Surface treatment:

Each and every Stainless Steel components of SEALEXCEL Push-in-fittings are electropolished to ensure a corrosion resistant surface layer of chromium oxide which is passive.

Operating parameters:

Pressure : upto 290 PSI (20 bar)

Temperature : upto 150° C

Available sizes:

Metric size ranges from:
4mm through 16mm Tube OD

Fractional size ranges from:
3/16" through 5/8" Tube OD.

Recommended tolerance on tube ± 0.05 mm

Material of Construction:

Note : 'O' Ring EPDM are available on request

The Stainless Steel 316 raw material meets the following specifications.

- a) SS-316 BAR STOCK : ASTM A-479
- b) SS-316 FORGING : ASTM A-182

Identifications:

SEALEXCEL Metric and Fractional size Stainless Steel Push-in-Fittings are similar in appearances.

The significant difference is in the internal diameter of the Push-in-Fittings components, hence for easy identifications between metric and fractional sizes. SEALEXCEL provided 'V' Groove on Fractional sizes Push-in-Fittings as shown below.

INSTALLATION INSTRUCTIONS:

1) For Tube : Semi-rigid Nylon Tube
Flexible polyurethane tube
Low density polyethylene tube
Fluoropolymer FEP140 tube

Ensure that the end of tube is cut square (90°) and free from burrs and sharp edges.

FOR TUBE : Stainless steel and Copper tube

Ensure that the end of the tube is cut square (90°) and chamfer the outer corner of tube, remove the burrs and sharp edges to prevent the damages of 'O' Ring. Provide groove for tube gripping and locking.

2) Insert the tube by hand into the fitting assembly resting it firmly against internal shoulder of the fittings. The Gripping collet hold the tube firmly in place, without deforming the tube or restriction flow.

3) To release the Tube : Press the Releasing Sleeve and pull out the tube from fitting.

ORDERING INFORMATION:

The part Number describes complete assembly of SEALEXCEL Push-in Fittings.

Example: For Metric size : PIFTMC-6-250RT-EV
